

PHGY 312
RESPIRATORY, RENAL & CARDIOVASCULAR PHYSIOLOGY
COURSE SCHEDULE
Winter 2019

Lecturers: Dr. John Hanrahan (Coordinator), Room 1016A, McIntyre building, 514-398-8320, john.hanrahan@mcgill.ca
Dr. Jacopo Mortola, Room 1121, McIntyre building, jacopo.mortola@mcgill.ca
Dr. Sheldon Magder, Glen Hospital, sheldon.magder@muhc.mcgill.ca
Dr. Alvin Shrier, Room 170, Bellini Building, 514-398-2272, alvin.shrier@mcgill.ca
Location: Arts Bldg., Room W-120 (853 Sherbrooke Street W) Monday/Wednesday/Friday 9:35am - 10:25am

Date	Day	Lecture Title	Lecture	Lecturer
Jan. 7	M	Overview of circulation; Basic principles: Pressure-flow & Pressure-volume relationships: structure of the circulation	1	S.M.
9	W	The heart as a pump. Basis of cardiac function curve (Starling's Law) and the cardiac pressure-volume relationship.	2	S.M.
11	F	Principle of venous return and bathtub concept. Stressed and unstressed vascular volume	3	S.M.
14	M	Integration of cardiac and return function and the control of cardiac output.	4	S.M.
16	W	Control of circulation: baroreceptor reflex, myogenic response, flow-mediated response; metabolic response. The problem of standing up. Sign up on myCourses for oral presentation (by professor) starting at 11:00am	5	S.M.
18	F	Special circulations including the coronary, cerebral and pulmonary circulations. Integrated cardiovascular responses including valsalva maneuver, and tilt.	6	S.M.
21	M	Transmembrane potentials; resting potential; slow and fast action potentials	7	A.S.
23	W	Ionic channels; activation, inactivation, pharmacology, voltage dependence, current-voltage relations Topics for oral presentation on myCourses (for review only)	8	A.S.
25	F	Automaticity: pacemaker mechanism, controls, dynamics; conduction: sequence, local current flow	9	A.S.
28	M	ECG: and cardiac arrhythmias Sign up on myCourses for individual presentation topic starting at 11:00am	10	A.S.
30	W	EC coupling; mechanics	11	A.S.
Feb. 1	F	Functional Microanatomy of the Kidney	12	J.H.
4	M	Glomerular Filtration (GFR) and the clearance concept	13	J.H.
6	W	Renal Plasma flow and regulation of blood flow	14	J.H.
8	F	Membrane mechanisms and epithelial transport. Diffusion, permeability.	15	J.H.
11	M	TEST #1 – Cardio (No class) – 7:00pm - 8:30pm, Palmer Howard Room 522 (McIntyre Bldg.) Please bring your McGill I.D card to the exam.		
13	W	Active transport. Features unique to epithelial cells. Renal handling of organic solutes I (glucose).	16	J.H.
15	F	Renal handling of organic solutes II. Transport of amino acids, urea, creatinine, PAH, urate and proteins.	17	J.H.
18	M	Sodium and chloride transport I. Late proximal tubule, loop of Henle	18	J.H.
20	W	Sodium and chloride transport II. Distal tubule & cortical collecting duct. Water transport and aquaporins. Intro to the renal concentrating mechanism	19	J.H.

Date		Lecture Title	Lecture	Lecturer
22	F	Renal concentrating mechanism. Efficiency and control, role of urea, diuretics, intracellular osmolytes	20	J.H.
25	M	Acid-Base Balance	21	J.H.
27	W	Potassium homeostasis and the renal excretion of potassium	22	J.H.
Mar. 1	F	Control of Body Water and NaCl balance	23	J.H.
		READING WEEK (March 4 to March 8)		
11	M	TBD		
13	W	TEST #2 – Renal (No class) – 7:00pm - 8:30pm, Palmer Howard Room 522 (McIntyre Bldg.) Please bring your McGill I.D card to the exam.		
15	F	Needs for Oxygen	24	J.M.
18	M	The functional design of the respiratory pump	25	J.M.
20	W	Lung expansion	26	J.M.
22	F	Breathing in and out	27	J.M.
25	M	Distribution of the inspired air	28	J.M.
27	W	Gases in the body	29	J.M.
29	F	Neural regulation	30	J.M.
April 1	M	The VE response to hypoxia	31	J.M.
3	W	High altitude	32	J.M.
5	F	Temperature and breathing	33	J.M.
8	M	Muscle exercise	34	J.M.
10	W	Perinatal respiration	35	J.M.
12	F	TBD – LAST DAY OF CLASSES		

Cardio Tutorial:

Dr. A. Shrier:

Thursday, January 31, 2019 from 5:30pm – 6:30pm in the Meakins Theatre, Room 521, McIntyre Bldg.

Dr. S. Magder:

Friday, February 1, 2019 from 5:30pm – 6:30pm in the Meakins Theatre, Room 521, McIntyre Bldg.

Dr. Mortola:

“Discussions on Respiration”: April 5th (Fri.), Room 1019 & April 10th, (Wed.), Room 1101 from 3:30pm - 5:00pm.

**** Students are responsible for checking MyCourses for course notes/slides and any updates****

Note that infringements of copyright can be subject to follow up by the University under the code of Student Conduct and Disciplinary Procedures.*

EVALUATION

1. Class Tests – (20% each)

There are 2 class tests. The first class test is on **Monday, February 11, 2019** at **7:00pm-8:30pm, Palmer Howard Room 522 (McIntyre Bldg.)** and will cover the **Cardio** section of the course. The second class test is on **Wednesday, March 13, 2019** at **7:00pm-8:30pm, Palmer Howard Room 522 (McIntyre Bldg.)** and will cover the **Renal** section of the course. Class tests are usually, but not always, multiple-choice type questions and may have a component that is short answer or essay. Please note that multiple versions of exams will be administered in order to reduce any temptation for copying a more "correct" answer. Once the tests have been graded, an **Exam Viewing** will be scheduled.

Medical Notes

Students who miss a test due to a medical or other acceptable reason must provide a note to the Course Secretary (McIntyre, Room 1021) **within two weeks of the missed test**. The value of the final exam will then be increased proportionally. A mark of zero will be given to students with no note. There are no makeup tests.

2. Assignment (Oral Presentation) – (20%)

Sign up on **myCourses on Wednesday January 16, 2019 starting at 11:00am** on **one** of the professor's section that interests you (Renal: Dr. Hanrahan, Cardio: Drs. Shrier & Magder, Respiration: Dr. Mortola) (spaces are limited). Once you have secured your spot for that professor's assignment that interests you, you will **then sign up for the individual topic on Monday, January 28, 2019 starting at 11:00am on myCourses** (One topic per student). Instructions on the sign-up will be posted on *myCourses*. The assignments will consist of an oral presentation (i.e.: presenting a scientific paper to the professor and a small group of students. The presentation dates will be available at the end of January/early February and you will have to sign up again on *myCourses*. Please keep checking *my courses* for the date and time of this sign up.

- a) The oral presentations for the **Cardio** section will be from **March 11 – March 18**
- b) The oral presentations for the **Renal** section will be from **March 15 – March 22**
- c) The oral presentations for the **Respiratory** section will be from **March 22 – April 10**

****All assignments are of similar difficulty and grades will be normalized (up or down) so that they are fair and comparable for each section****

3. Final Exam – (40%)

The Final exam is usually but not always "multiple choice" type questions and may have a component that is short answer or essay. All three sections of the course will be covered, with more emphasis on the last section, so that all three sections are evaluated equally. Please note that multiple versions of exams will be administered in order to reduce any temptation for copying a more "correct" answer. **Supplemental/Deferred** and **Religious Conflict** exams will differ from the final exam. They may consist of multiple choice, short answer or only essay type questions.

MARKING SCHEME

In summary, the 2 class tests count for 20% each; the oral assignment counts for 20%; and the final exam is worth 40%, totaling 100% of the final grade.

Grading

The Department of Physiology will **NOT** revise/upgrade marks except on sound academic grounds. Once computed, the marks in this course will **NOT** be altered/increased arbitrarily. These marks are **FINAL and NON-NEGOTIABLE**.

CONTACT INFORMATION

Professors may arrange special tutorials and/or office meetings with students who require more specific directions for the assignment and/or class tests.

TUTORIAL SERVICE

Student Services provides an additional tutorial service: Brown Building, Suite 4200, 514-398-6011.

COURSE EVALUATIONS

Course evaluations will be available through Minerva at the end of term.

McGill University values academic integrity. Therefore all students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the Code of Student Conduct and Disciplinary Procedures (see <http://www.mcgill.ca/srr/honest> for more information).

Every student has the right to write term papers, examinations, and theses in English or French, except in courses where knowledge of the language is one of the objectives of the course.

In the event of extraordinary circumstances beyond the University's control, the content and/or evaluation scheme in this course is subject to change.
